

**STOPS RUST & PREPARES
RUSTED METAL FOR PAINTING.**

Rustex is a rust inhibiting coating which converts rusted metal overnight into a rust retarding, paintable surface. When applied to rusted surfaces, iron oxide (rust) is chemically changed to iron phosphate, an inert, hard substance that turns the metal black. This increases the paint adhesion, and durability of the coating.

EASY TO USE.

Can be applied by brush, roller, mop, or low pressure sprayer.

ECONOMIC.

Treats 600 sq. ft. per gallon.

COMPATIBLE WITH ANY PAINT SYSTEM.

ENVIRONMENTALLY FRIENDLY

Biodegradable.

**CAN BE USED TO ETCH
NEW GALVANIZED.**
