

XIM®

ELAST 'O' MERIC

WATER BASED

OPEN TIME EXTENDER

Product Code: 1108-2

Contents: 0.9 L

VOC: 71.0 g/l

(See cautions on back panel)

XIM Elast 'O' Meric

XIM's Elast'O'Meric is a safe, biodegradable additive designed for water based, elastomeric coatings.

It improves the flow and leveling and can generally extend the open time 10–15 minutes for improved brush and roll application. It helps reduce the “ropy, brush-mark” appearance often seen when brushing thick, fast dry elastomeric paints. It will allow the thick elastomeric paint formulations to flow out smoothly when brushing. It can also improve spray applications by improving the atomization of heavy bodied waterborne paints. These water borne and elastomeric paints can then be applied at lower pressures.

Elast'O'Meric does not change the final cured paint film properties. It does, however, help bring the gloss up to coating's designed gloss. It leaves no residue in the final paint or coating film. It will not cause paints to yellow or turn milky. It will not yellow or cloud semi-transparent or clear coatings. When adding the Elast'O'Meric there will be no reduction in flash rust control or sag control of the elastomeric or waterborne paint or primer.

Product Use: Add between 15 ml per liter, but no more than 45 ml per liter or paint. The use of Elast'O'Meric will not change the overall cure time, but can extend the “wet edge” or application working time. Always check a small quantity for compatibility and effect on the coating and its application properties before starting the job.

Product Preparation: Mix or shake well before use.

Clean Up spills with water

Contains: Water, 7732-118-5; Propylene Glycol, 1336-21-6; Surface Wetters, Trade Secret; Flow Additives, Trade Secret; Rheology Modifiers, Trade Secret

CAUTION: If swallowed, do not induce vomiting. **CALL A PHYSICIAN IMMEDIATELY.** If you experience difficulty in breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical assistance immediately. In case of eye contact, flush with plenty of water for at least 15 minutes and get medical attention; for skin, wash thoroughly with soap and water.

KEEP OUT OF REACH OF CHILDREN

Close containers after each use.

For additional information see the Material Safety data Sheet (MSDS) for this product.
